

OPT on gcc

Number of Frames	Page Faults	Writes
8	118,480	10,271
16	80,307	7,669
32	55,802	5,422
64	38,050	3,712

OPT on bzip

Number of Frames	Page Faults	Writes
8	18,251	3,647
16	2,427	310
32	1,330	205
64	821	143

Clock on gcc

Number of Frames	Page Faults	Writes
8	181,856	18,285
16	121,682	10,703
32	87,686	8,215
64	61,640	6,007

Clock on bzip

Number of Frames	Page Faults	Writes
8	46,164	6,973
16	3,468	412
32	2,203	294
64	1,318	224

NRU on gcc using 8 frames

Refresh Rate	Number of Frames	Number of Frames
1		
2		
16		
32		
64		
128		

Writeup: I was unable to finish the random page replacement algorithm, and I was unable to completely debug my NRU algorithm. I would assume that the NRU algorithm performed best due to the refreshing property of NRU, but I was unable to verify my assumption.
